AI-POWERED LOSS PREVENTION

**Empower Your Video Surveillance with Artificial Intelligence**

Veesion works with your existing video surveillance system to automatically detect shoplifting in your store in real-time. It uses the latest advances in deep learning to detect suspicious behavior and gestures that indicate a theft is occurring and sends immediate alerts.

Veesion detects theft in real-time using artificial intelligence to

- Analyze video surveillance 24/7
- Detect suspicious behavior & movements - with no facial recognition involved
- Immediately send alerts to selected devices

Retailer Benefits

- Reduce shoplifting
- Deter repeat offenders
- Identify problematic areas with recurring theft
- Real-time with alerts sent to your mobile device
- Plug-and-play system compatible with all devices
- Detection system personalized to your store

Customer Support

Veesion provides ongoing maintenance and support to ensure your system is optimized for best results.
